

# Benzapon Summer Wind

## Special drycleaning detergent for hydrocarbon solvents

---

### Properties:

- incredible improvement of ironing properties
- summer freshness permeates deeply into the fibres of the garments by optimal cleaning effect
- provides the garment with an excellent antistatic effect
- gives the cleaned garments a discreet fresh fragrance
- provides clear, brilliant colours
- with effective odour absorber
- acts deodorizing

### Application:

#### Stock liquor

2 - 3 ml **Benzapon Summer Wind** per L solvent in the work tank and filter (0.25 - 0.40 fl oz/gal)

#### Topping-up additive

##### *Machines without distillation*

Daily addition when starting the work (10 loads/day) = 1 ml **Benzapon Summer Wind** / L liquor

##### *1-bath method*

At least 25 % liquor exchange (extraction to the still) or distillation of the entire liquor in the work tank at the latest after 10 loads = 4 ml **Benzapon Summer Wind** / kg garments (0.6 fl oz/10lbs)

##### *2-bath method*

With at least 50 % liquor exchange (1st bath completely to the still) = 8 ml **Benzapon Summer Wind** / kg garments (1.2 fl oz/10lbs) into the 2nd bath

#### Comments / Special hints

**Benzapon Summer Wind** is not suited as pre-brushing agent. We recommend **Benzapon Pre** as pre-brushing agent.

More information on the process technology you can find in our brochure: "Use of Textile Care Agents in Dry-cleaning"

### Technical Data:

Density 20 °C (68 °F)	0.87 g/ml
pH-value	6.0 - 7.0
Ionogenity	anionic
Flashpoint	62 °C (143.6 °F)

### Hints:

#### Storage

Benzapon Summer Wind is not sensitive to frost, but storing it for a longer period at temperatures below 0 °C (32 °F) it becomes viscous and can even solidify. It is fit for use again after thawing without any loss of quality. Keep container tightly closed. The product can be stored for at least 24 months in its original sealed packing.
